DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-36, drawn to a method for diagnosis in a vascular disease by determining the THBS2, ACE and FGB genetic profile, classified in class 435, subclass 6.
- II. Claims 37-45, drawn to a computer readable medium, electronic system, and network classified in class 702, subclass 19.
- III. Claims 46-49, drawn to a composition, classified in class 536, subclass 23.1.
- IV. Claims 50-52, drawn to kits containing probes and primers, classified in class 536, subclasses 24.3 and 24.33.
- V. Claims 53-63, drawn to a method for determining the identity of allelic variants, classified in class 435, subclass 6.
- VI. Claims 64-89, drawn to a method of assessing risk, classified in class 702, subclass 19 and Class 128, subclass 920.
- VII. Claims 90-119, drawn to a personal health report, classified in class 702, subclass 19 and Class 128, subclass 920.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups (II and IV) and Group I, II, V, VI, and VII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the nucleic acid

compositions of Group III and IV can also be used for antisense therapy, which is not required for any of the claimed methods.

The inventions of Group I, II, V, VI, and VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case while the different inventions all recite limitations with regard to THBS2, ACE, and FGB, the different methods (and devices/systems for performing methods) are directed to different results (effects) and the method for each Group recite different method steps (function of operation) requiring a search separate from that of the method of any other group. In addition, steps in the method of one Group may be performed without knowledge of or reference to the steps or results of another Group method.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Inquiries

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1.
